Foundation Secures Major Funding for New Cancer Center

March 2009

Through the sponsorship of Speaker Nancy Pelosi, St. Mary's Medical Center Foundation will receive \$471,240 in federal funding to help purchase the linear accelerator for the hospital's new Cancer Center. Construction is moving forward on the Center, which will be located on the ground floor of the 2250 Hayes Street Building. The comprehensive Cancer Center will bring together radiation therapy, infusion therapy, and other services to provide a full range of cancer treatment for our patients.
